The number of applications for biochar continues to grow:

- Waste management
- Water treatment
- Animal husbandry
- Responsible forest management
- Mining
- Regenerative agriculture
- Aquaculture
- Housing and construction
- Energy production and storage
- Medicine

... the list goes on

... all whilst drawing down CO2 for safe, affordable long-term Pyrogenic Carbon Capture and Sequestration PyCCS.

From low tech through to high tech, from domestic to industrial, from personal care, to global reach,

Biochar and even specialised DesignerChars have something for everyone.

A day of talks and facilitated workshops that show you how to turn waste streams into income streams.

BIOCHAR - TURNING WASTE INTO GOLD
